

Pole Tents

Many Tents, One Sense of Purpose

ATC Canopy

The Over-the-Counter Solution

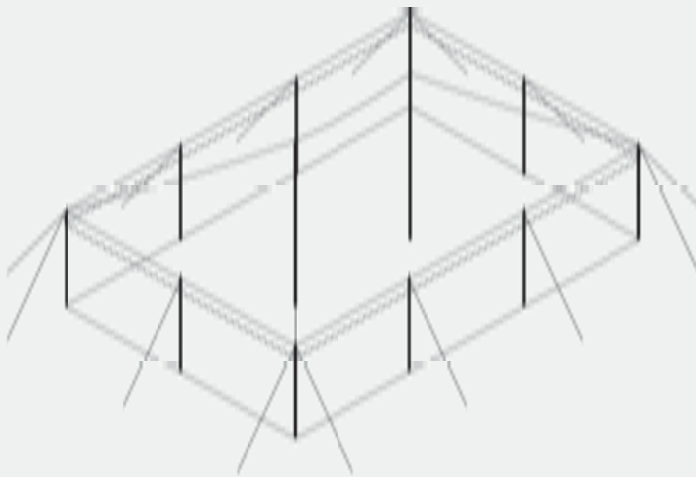

The ATC Canopy is an entry level pole tent system designed for its ease of installation and is perfect for novice tent users and over the counter rental applications. The ATC canopy tent tops is constructed of a heavy duty 12oz laminated vinyl allowing for a water tight fabric that is easy to clean and additionally is inherently flame retardant. The pole system is entirely constructed of sectional anodized aluminum poles that break down into small sections that will fit into most any passenger vehicle.

Benefits

- Easy to transport, light weight design
- Easy to install
- Very few parts
- Standard wall snap line allows for easy installation of side walls
- Interchangeable hardware parts between sizes

ATC Canopy

Specifications

- Sizes: 10'x10', 15'x15', 20'x20', 20'x30', and 20'x40'
- Fabric: 12oz Laminated PVC
 - Translucent white & colors. 15oz Blackout UW
 - Fabric certified flame retardant
- Pole System: 1.75" OD structural aluminum tubing
 - All aluminum anodized
 - Injection molded pole caps and pins
- Stakes: 5/8" single headed stake w/hook
- Tie-down ropes braided to tent top
- Tension with 3/8" "Dog-Bone" rope sliders
- Powder coated aluminum peak fittings
- Perimeter web constructed of 1" PVC coated webbing
- Small wave valance
- Standard wall snap line attachment

Traditional Pole Tent

The Tensioned Specialist

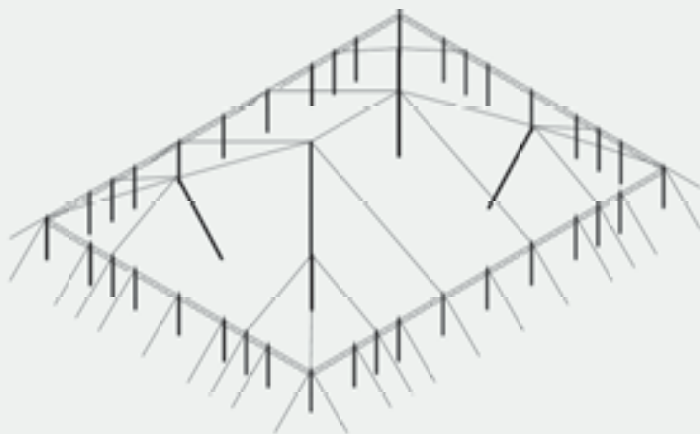

The Traditional Pole Tent is the grandfather of all tents tracing its roots back to the days of the “big top circus tent” in which so many can relate. The entire tent system is essentially a push pole style design with very traditional shape and function. While smaller sizes are solely supported by center poles, side poles and guyed to anchoring stakes, the larger sizes (>50’ wide) rely on secondary poles called “hip” poles and “quarter” poles to aid in supporting the fabric top. These tents are supplied with jumper ropes and tie-down ropes but you can opt to modify the tensioning system for the more user friendly web ratchet system. Sizes range from 20’ wide up to 120’ wide and are available in expandable and non-expandable versions.

Benefits

- Traditional classic design
- Cost efficient
- Expandable and non-expandable versions available
- Standard wall snap line allows for installation of side walls

Traditional Pole Tent

Specifications

- Widths: 20’, 30’, 40’, 50’, 60’, 80’, 100’, and 120’
- Fabric: 15oz Laminated PVC
 - Blackout UW, translucent white & colors
- Fabric certified flame retardant
- Side Poles: 2.5” OD aluminum, 2” SCH40 aluminum
 - All aluminum anodized
- Center Poles: 2.5” OD aluminum, 4”OD aluminum, 4”SCH40, 6”SCH40
 - All aluminum anodized
- New powder coated aluminum perimeter plates
- Expandable mids available for each width
- Sixty foot (60’) and larger available in optional bail ring design
- Ropes braided to tent tops
- Standard wall snap line attachment

Series 1000

High Peak for High Success

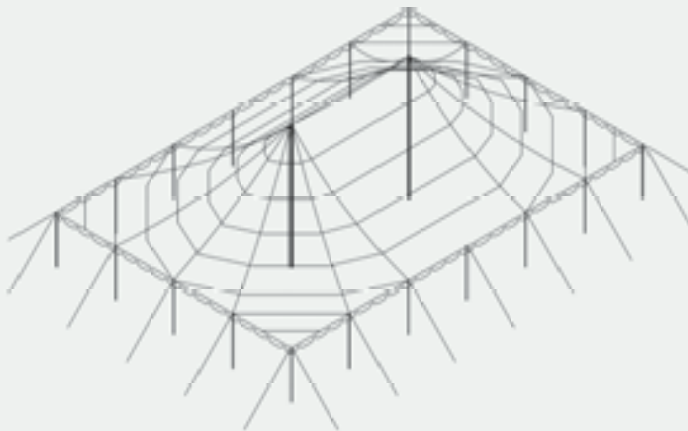

The Series 1000 is a light weight tensioned pole tent system with a shape and style similar to larger engineered tension tents without the added weight and extra reinforcing found in those designs. All visible webbing is coated with PVC so it remains free of dirt and is easy to clean. The fabric tent tops are constructed in both one piece and expandable designs with our highly polished translucent or Ultrawhite (blockout) style fabrics. Complete packages include tops, poles, stakes and web ratchets.

Benefits

- Unisex design- ends are ½ lace- ½ grommet
- 100% coated webbing
- Zinc plated grommets at pole penetration points
- Expandable sections include nipple & flange
- New powder coated aluminum perimeter plates eliminate rust
- Classic scalloped valance

Series 1000

Specifications

- Widths: 20', 30', 40', 50' and 60'
- Fabric: 15oz Laminated PVC
 - Blackout UW, translucent white & colors
- Fabric certified flame retardant
- Side Poles: 1.75" OD aluminum (20x)
 - 2.5" OD aluminum (30x, 40x)
 - 2" SCH40 aluminum (50x, 60x)
 - All aluminum anodized
- Center Poles: 2.5" OD aluminum (20x)
 - 4" OD aluminum (30x, 40x)
 - 4" SCH40 aluminum (50x, 60x)
 - All aluminum anodized
- New powder coated aluminum perimeter plates
- Expandable mids available for each width
- Standard wall snap line attachment

Series 1200

Extending Options

The Series 1200 is one of Aztec's new Compatible Plus product lines designed to offer existing tent users flexibility and choices when replacing their tent tops. The Series 1200 is designed to be compatible with the Century® Mate brand of pole tents offered by Evansville, IN based Anchor Industries. Whether you need to replace an entire top, hardware parts or simply one mid section to your current inventory you are guaranteed to have more options and choices with the Series 1200 and the Compatible Plus lineup. All visible webbing is coated with PVC so it remains free of dirt and is easy to clean. The fabric tent tops are constructed in both one piece and expandable designs with our highly polished translucent or Ultrawhite (blockout) style fabrics.

Benefits

- Easily transportable
- Compatible with other products
- 100% coated webbing
- Web style lace system
- Zinc Plated grommets at pole penetration points
