81x111	8,424	561
81x141	10,862	724
81x171	13,300	886
80x201	15,738	1,049

Notes on Capacity Recommendations: Capacity shown is a simple calculation of the area of the tent divided by 15sqft per person. This allowance will give you ample space for guests seated at round or rectangular tables of 10 including walkways between tables, but the entire tent space would be tables and chairs. This is a general rule of thumb that would provide coverage to all of the tables of seated guests. This calculation does not include additional space required for any of the following needs: Stage, dance floor, bar areas, lounge areas, buffet lines, etc. The space for these added areas should be considered when selecting the correct size of tent.
